

## How severe do you think your Pso is?

1 hand = 1% of your body surface is affected

Less than  
**x3**

Can you fit your hand over your psoriasis less than 3 times?

If so, less than 3% of your body surface is affected by Pso

You may have  
**mild** psoriasis<sup>1</sup>

Between  
**x3 and x10**

Can you fit your hand over your psoriasis 3 times or more, up to and including 10 times?

If so, between 3% and 10% of your body surface is affected by Pso

You may have  
**moderate** psoriasis<sup>1</sup>

More than  
**x10**

Can you fit your hand over your psoriasis more than 10 times?

If so, over 10% of your body surface is affected by Pso

You may have  
**severe** psoriasis<sup>1</sup>

If your doctor has already diagnosed you with plaque psoriasis, part of learning about your condition is understanding how severely your body surface is affected. But remember, even if your Pso doesn't affect over 10% of your body surface, severity is also measured by how it affects your quality of life.<sup>1</sup>
